Jakob Agelin

DATA PLATFORM ENGINEER

Data platform engineer with eight years of consulting across Scandinavia. Owns and modernises Azure and Databricks platforms end to end: architecture, CI/CD, data quality and the standards other engineers build on.

EXPERIENCE

Data Engineer, Consid

2023 — present

Ambea. Led the move of a multi-country BI platform from on-premises to Azure Databricks. Moved orchestration to Databricks-native jobs and set up governance in Unity Catalog. Split dbt Cloud into domain projects with dbt Mesh, on a medallion architecture with Kimball modelling. Brought AI-assisted coding practices into the team; CI/CD in Azure DevOps and Terraform.

Bostadsförmedlingen i Stockholm. Modernised a legacy on-premises BI solution: SQL Server, SSIS and Power BI.

Data Engineer, Capgemini

2022 — 2023

Hedin Bil. Data pipelines in Data Factory and Databricks, built for data quality and cost efficiency.

Data Platform Owner, Visiba Care

2021 — 2022

One-person data team at a healthcare startup. Built and owned the platform from scratch, including YAML CI/CD for Data Factory, SQL, Analysis Services and Power BI.

Tech Lead / Consultant, Capgemini

2018 — 2021

Volvo Cars. Led the global rollout of Configure Your Volvo across 30+ markets and owned its roadmap.

EDUCATION

Göteborgs Universitet

2015 — 2018

BSc Systems Science, IT, Human and Organisation

SKILLS

Platform
Azure, Databricks (Unity Catalog, Lakeflow Jobs), Data Factory, SQL Server

Delivery
Terraform, Azure DevOps, Git, YAML CI/CD, Docker

Data
SQL, Python, PySpark, T-SQL, dbt Cloud, dbt Mesh, DAX, Power BI

Practice
Medallion architecture, Kimball, data governance, data quality, AI-assisted development

CERTIFICATIONS

dbt Developer
dbt Labs, 2025

Data Engineer Associate
Databricks, 2023

Spark 3.0 Associate Developer
Databricks, 2023

Azure Data Engineer Associate
Microsoft, 2022
